

Case Scenario Template

The purpose of this scenario is to allow the participants to process information and provide suggested interventions. The following is a structure for presenting the case scenario but please feel free to develop as you see fit. Using powerpoint will be helpful for the participants to follow. Allow 1 hour for the presentation.

1. Provide limited history initially

Example:

“A 5 year old female presents to the ED for care after disclosing to her mother that her uncle Jimmy put his privates in her privates.”

Lead the participants in discussing what information should be obtained initially.

Develop a decision-tree helping them to understand what would constitute an emergent medical evaluation prior to a forensic examination.

Discuss importance of determining time since incident in order to determine care that may be delivered.

Medical Care

Forensic Evidence Collection

DFSA kit

- 2. Lead the participants in discussing what information should be obtained with respect to the history of the abuse with attention to not leading or over-interviewing children in the ED.**
- 3. Present photos and have the participants interpret.**
- 4. Lead the participants in discussing what evidence should be obtained based on the history and the physical exam.**
- 5. Ask participants what treatment options may be offered to the patient. Review the current CDC Guidelines <http://www.cdc.gov/std/tg2015/sexual-assault.htm>**

Obviously there will be different pathways for prepubertal vs pubertal children

- a. STI prophylaxis HIV nPEP
 - b. Hepatitis Vaccine
 - c. HPV vaccine
 - d. Tetanus
 - e. Emergency Contraception
- 6. Discuss what participants may say in court about findings or lack of findings**

- 7. Discuss any teaching points you think are important.**
- 8. Present any legal outcomes that may be available at the time of the presentation if your case is real.**
